

Physician total compensation programs continue to evolve to address changing models of care, the need for organizational alignment and a competitive market for talent

Continued upward pressure on physician compensation without corresponding gains in productivity requires critical focus on quality of care and organizational efficiencies

Trends in productivity have varied significantly over the past 12 years

Median Compensation and Productivity Trends

Increasing prevalence of value-based compensation practices with a growing focus on the alignment of physician and advanced practice provider (APP) performance metrics

Median TCC per Work RVU Rates

Physicians	Primary Care	Medical	Surgical	Hospital-Based
With Quality Compensation	\$53.14	\$66.05	\$66.48	\$59.39
Without Quality Compensation	\$48.84	\$61.78	\$61.79	\$55.91
Percentage Difference	-8.8%	-6.9%	-7.6%	-6.2%

54% of orgs. with physician incentive plans include a value/quality component

38% of orgs. with APP incentive plans include a value/quality component

Skilled physician leaders will continue to demand a premium in a highly competitive market as organizations rely on physicians to lead clinical transformation and alignment efforts
